

P a t e n t   c l a i m s

1.

A pacifier for receiving a cartridge (2) containing flavoured substances that are to be  
5 ingested orally, comprising a base part (3) having a cartridge chamber (3d), a nipple (4),  
at least one flow channel (5) between the cartridge chamber (3d) and the nipple and at  
least one hole (8) that is in communication with the flow channel (5) in the nipple (4),  
characterised in that the flow channel (5) at least is formed in the nipple (4).

10 2.

A pacifier according to claim 1, characterised in that the flow channel (5) extends along  
almost the entire length of the nipple (4).

3.

15 A pacifier according to claim 1 or 2, characterised in that several parallel flow channels  
(5b) are formed in the nipple (4).

4.

A pacifier according to claim 1, 2 or 3, characterised in that a prechamber (5a) in the  
20 form of an enlargement of the flow channel (5) is formed at the hole/holes (8).

5.

A pacifier according to claim 1, 3 or 4, characterised in that the cartridge chamber (3d)  
extends some way into the nipple (4).

25

6.

A pacifier according to one of the preceding claims, characterised in that the cartridge  
chamber at an insertion opening (3c) for the cartridge (2) is equipped with a cap (1),  
preferably a hinged cap (1).

7.

A pacifier according to claim 6, characterised in that the cap (1) is equipped with an air inlet hole (9), preferably in connection with a hollow piercing means for piercing the cartridge (2).

5

8.

A cartridge for use in a pacifier according to claim 1, 2, 3 or 4, characterised in that it comprises a housing of a substantially rigid material and at the end thereof that is to be inserted into the pacifier is equipped with a pierceable sheet that is arranged to be  
10 pierced by suitable means in the pacifier in order to open communication between the interior of the cartridge and the channel (5).

9.

A cartridge according to claim 8, characterised in that it comprises a tear-off or  
15 pierceable sheet at an opening (2a) at the cartridge end opposite the insertion end.

10.

A cartridge according to claim 8 or 9, characterised in that the cartridge (2) has a portion (2c) that is designed to extend some way into the nipple (4).
